

## from the other room

Sarah Barrios

I wanna be where you are  
Wish it was as simple as two kids falling in love  
Maybe in dreams we're better off  
The story of us might play out different if it was

Over and over  
Ripped at the seams

It's gonna kill us  
We knew from the start  
Delusion is fun till  
It all falls apart

Then it's parties in silence  
You'll bite your tongue until it's blue  
And I'll love you from the other room

I don't really know what to say  
It's kind of annoying how  
You make me feel some type of way

Wish I could say it to your face  
But everything's blurry now  
And nothing seems to look the same

Over and over  
Anxious as hell

It's gonna kill us  
We knew from the start  
Delusion is fun till  
It all falls apart

Then it's parties in silence  
You'll bite your tongue until it's blue  
Oh

It's the way that I hate you  
For saying my name  
'Cause at least if you hadn't  
I could just walk away  
Now we're stuck at this party  
You'll bite your tongue until it's blue  
And I'll still love you from the other room
