

## little house

Sarah Barrios

Step inside this little house  
There's people talking way too loud  
And a crowded kitchen made for only two

It's mess but through it all  
The scary things don't feel as tall  
We'd never make anywhere without you

Sunlight through the trees  
Never wanna leave

Seasons change it's funny how  
We've gotten big  
We're parents now

These walls don't look as  
Colorful without you

But by the time my kids are old  
They'll know the stories that you told

And we'll hear you laughing  
From the other room

Same songs being sung  
Feels just like it was

Know we'll always have  
This little house
