## Shine

## **Sarah Bettens**

She says she's got it all planned out She's got places to go And I don't have a single doubt She will find her way home

And she laughs Like she's free And it's like a thousand lights that Once she moves With her soul

Shine, shine when the world is dark as night Don't be afraid to know you're right And when you just can't shine no more That's what I'm here for Ooohh

I know that I can't trade with you I was ten once before But all the things that make you you I would pay highly for

And she laughs Like she's free And it's like a thousand lights that Once she moves With her soul

Shine, shine when the world is dark as night Don't be afraid to know you're right And when you just can't shine no more That's what I'm here for

And I know you're here for a million reasons Some still to come In my heart you're here To make sure that I have One more girl to love

Shine, shine when the world is dark as night Don't be afraid to know you're right And when you just can't shine no more That's what I'm here for
