

Some Things Don't Change

Sarah Buxton

Every new generation
Gets a little impatient
Sick and tired of the way that it was
All the kids into new things
Find another way to do things
Can't turn the page fast enough

But sun's still hot
Waters still wet
Beer still tastes better with a red sunset

Some things... oh, some things don't change
Some things... oh, some things don't change

Every time there's a new style
Old folks say it's too wild
It was better in the way back when
People talking in the new slang
Different way to say the same thing
Yeah, that's how it's always been

Kids are alright
Just wanna be cool
So hold on tight, love's gonna see us all thru

Some things... oh, some things don't change
Some things... oh, some things don't change

Just like the earth's circled by the moon
My world will always revolve around you...

Some things... oh, some things don't change
Some things... oh, some things don't change
...
