

Me, Myself & I

Sarah Cothran

They keep me up at night
Head under my pillow
I'm trying to cry myself to sleep

Find it exhausting
Blocking 'em out
Pushing it down
I live with the enemy

I'm trying to breath in, breath out
But they're breathing down my neck
It's too much and too loud
Thought they were leaving
But I guess they never left 'cause

I've been trying to get a hold of me
But my own mind has split us up in 3
I'm alright until they disagree
The person I am
The person I was
The person I'm trying to be

Someone please call a referee
When they're all fighting where do I find peace?
I feel all of them inside of me
The person I am
The person I was
The person I'm trying to be

Me, myself & I
We have a hell of a time
It's making me kind of sick
One is stuck in the past
While the other half is
Trying to trick me into giving in to it

I'm trying to breath in, breath out
But they're breathing down my neck
It's too much and too loud
Thought they were leaving
But I guess they never left 'cause

I've been trying to get a hold of me
But my own mind has split us up in 3
I'm alright until they disagree
The person I am
The person I was
The person I'm trying to be

Someone please call a referee
When they're all fighting where do I find peace?
I feel all of them inside of me
The person I am
The person I was
The person I'm trying to be

(The person I'm trying to be

The person I'm trying to be)

They keep me up at night
Head under my pillow
I'm trying to cry myself to sleep
