

Thing About You

Sarah Darling

The thing about you
There's a magic in your eyes
The sun could burn out it could all crash down
You don't even try
You're my clear blue sky
The thing about you
Is you're mine

Baby I've been around the world
Running with the shadow and the light
Baby it's true that there ain't nothing like
The thing about you

A hundred miles an hour
Jet black stingray
Gunning down the highway
Driving me wild

Baby I've been around the world
Running with the shadow and the light
Baby it's true that there ain't nothing like
The thing about you

Free and easy
Just like breathing
Deep into the rhythm of the ocean and the moon
That's the thing about me
The thing about you

Baby I've been around the world
Running with the shadow and the light
Baby it's true that there ain't nothing like
The thing about you

Baby I've been around the world
Running with the shadow and the light
Baby it's true that there ain't nothing like
The thing about you
The thing about you
The thing about you
Is you're mine
You're mine
You're mine
You're mine
You're mine
