

# Great Wide Open

Sarah Fimm

I often dream of the ocean  
Misty with salty perfume  
As I take to the sea  
The night goes with me  
By the light of a crystalline moon

Into the great wide open  
All of the stars become her  
Into the great wide open space we go

Out here I seek understanding  
Just A place for myself in the whole  
We have lost all control  
A warm west wind blows  
Let us go to explore the unknown.

Into the great wide open  
All of the stars become her  
Into the great wide open space we go

And I think I have found just the answer  
But can you let it unfold?  
When you can't live up to  
The highest plateau  
You can come with me  
We can go

Into the great wide open  
All of the starts become us  
Into the great wide open space we go.

Into the great wide open  
All of the stars become us  
Into the great wide open space we go.  
Let's go.
