

Dark Energy

Sarah Jaffe

Dark energy, stay away from me
I'm gonna fight for myself
Lethargy, you can go to hell
You were never really a friend to me

I hear it takes a long long while
To feel the ripple
The tear
Two black holes collide
Space, time, continuum

Dark energy, stay away from me
Wanna be good to myself
Superego, you can go to hell
You're only half as good as your enemy

I hear it takes a long long while
To feel the ripple
The tear
Two black holes collide
Space, time, continuum
Space, time, continue on
Space, time, continuum

Stay away from me, dark energy
Stay away from me
Stay away from me
Stay away from me, dark energy
Stay away from me
Dark energy
Stay away from me
Stay away from me, away from me
Stay away from me, away from me
(Space, time, continuum)
Dark energy
Stay away from me, away from me
Stay away from me, away from me
Dark energy
Stay away from me, away from me
Stay away from me, away from me
Stay away from me, away from me
Dark energy
