

Too

Sarah Kinsley

Haven't felt this way ever since you
Told me change was coming
You needed to meet me under the moon
Bring your hat in case you see her too soon
My friends argue it's because you left her
All I think about is being together
I'll bring Julie and Ella
Play guitar in your sweater
While you tell me you feel it too
Tell me you feel it too

I hear the pauses when we talk
Can't tell if I really like it or not
But we could talk for hours and hours about our
Infatuation with this old world
You make me laugh so much that it hurts
I could talk for hours and hours about you
A man of his word is long overdue
I think so much I convinced myself it's you

Haven't felt this way ever since you
Told me change was coming
You needed to meet me under the moon
Bring your hat in case you see her too soon
My friends argue it's because you left her
All I think about is being together
I'll bring Julie and Ella
Play guitar in your sweater
While you tell me you feel it too
Tell me you feel it too

A man of his word is long overdue
I think so much I convinced myself you feel it too

Haven't felt this way ever since you
Told me change was coming
You needed to meet me under the moon
Bring your hat in case you see her too soon
My friends argue it's because you left her
All I think about is being together
Gave you King and my letters
Don't you know any better?
You already know me better than most people do

Tell me you feel it too
Tell me you feel it too
