And we got to teach the kids

what you wear doesn't matter

What you feed the brain is worth more

I think there is a fundamental mistake in the statement of the issue in the question  
We can no longer continue to make policy for ourselves and our country and our region and our continent  
On the basis of whatever support the western world or France or the European Union can give us  
It will not work, it has not worked and it will not work  
Our responsibility is to charter a path which is about how we can develop our nation ourselves (yeah)  
It is not right
