

Exception

Sasha Keable

Promises you made to me keep on running through my mind
You're like a house key I can't find
What are we and who are you?
You're like my man but two point o feels like all you do's for show
Baby, I guess I get it
'Cause there's been a lot that we need to get straight
I don't think you're ready
But if you're ready
Then let that penny drop
Maybe I'll give you one more chance
If you just call this bullshit off

Take it as it comes, we were good as one
And I don't give second chances
But if you make those advances
You can be my exception

Won't ask you to say sorry
We can just move on, pick up where we left off
What do you say?
Didn't I make you happy, rethink your decision?
All can be forgiven, that's fine with me, yeah
Fine with me

People say I'm doing well
They can't believe all I've got done
But in my heart I hear that hum of memories and loneliness
I want to drink to ease the pain
But the drunk and sober feel the same
Ooh, I guess you get it (I guess you get it)
'Cause I fucked up enough times with you that you had to finish (You had to finish)
But maybe if you hear this
You might see past all my flaws
But if you don't and you move on
Just know I'll tell that bitch all yours (Tell that bitch all yours)

Take it as it comes (Take it as it comes), we were good as one
And I don't give second chances (Give second chances)
But if you make those advances (Make those advances)
You can be my exception

Won't ask you to say sorry
We can just move on, pick up where we left off
What do you say?
Didn't I make you happy, rethink your decision?
All can be forgiven, that's fine with me

Oh yeah
Don't let this be the end

Won't ask you to say sorry
We can just move on, pick up where we left off
What do you say?
Didn't I make you happy, rethink your decision?
All can be forgiven
Won't ask you to say sorry

We can just move on, pick up where we left off
What do you say?
Didn't I make you happy, rethink your decision?
All can be forgiven, that's fine with me, yeah
Oh yeah

That's fine with me, yeah
Oh yeah
