

## FEEL SOMETHING

Sasha Keable

You don't even know my name  
But you still want me, yeah  
I don't wanna play your games  
But you still haunt me, yeah  
It might be more of the same  
But when I'm lonely (yeah)

I just wanna feel something, something  
I just wanna feel something, something

Feels like I'm driving 95 with no lights on  
No seatbelt, on a terminated licence  
Last week I was tangled up with a Python  
Double back on my ex  
I was tryna heal something  
POV, can you picture me with your eyes closed  
Trucks on coming, my head's hanging out the window  
Oh, shit!  
That was real close

I just wanna feel something, something (I just wanna feel, oh)  
I just wanna feel something, something (I just wanna feel, oh)  
I just wanna feel something, something (Feel something, yeah)  
I just wanna feel something, something (Yeah, yeah, uh)

Touch me like I've never known  
Touch me like I've never known  
Touch me like I've never known  
Oh, baby, won't you touch me, baby  
Touch me like I've never known (Touch me)  
Touch me like I've never known (Touch me)  
Touch me like I've never known (Touch me)

I just wanna feel something, something (I just wanna feel)  
I just wanna feel something, something  
I just wanna feel something, something  
I just wanna feel something, something (Something, oh)

I just wanna feel something that you can't, oh  
Maybe [?]  
I just wanna [?]  
Get you lovin' good, you can't devote to  
Can you put your hands up in the motherfucking sky

Put your hands up in the motherfucking sky
