

Goosebumps

Sasha Keable

Texting, texting
I thought you'd had enough
Now there's no need to be discreet
I know what we're here for
Had a few other girls tell you that the dick was good
Now let me show you your potential
Let's get this understood
Don't mind if you fall in love babe
I want your breath on my body
Nothing else matters to me
Just come drown in this tsunami

Ooh, just come and keep me up
You know I love it when you give me goosebumps
Just come and keep me up
Boy, I know you love it when you give me goosebumps
Goosebumps

Facedown, back bent
Boy come and take the crown
Put your fingers in my mouth yeah
While I'm biting down
I won't take it less than once you better be prepared
We're not here for commitment
Nothing left undeclared
I like it rough with a calm touch
You like me on my knees while you stand up
Make like Eve eat the apple
Khia told you what to do

Ooh, just come and keep me up
Boy, I know you love it when you give me goosebumps
Just come and keep me up
I know you love it when you give me goosebumps
Goosebumps
