

## Deep

Sasha Sloan

Saw your favorite band play and they skipped your favorite song  
You were really hungry and he got your order wrong  
Went in for a haircut and you took a risk  
Now you're in the car crying 'bout how bad it is  
Yeah we all have days like this

Anytime you want to curse  
Just remember it could be worse  
So don't go crying over spilled milk  
Or making mountains out of molehills  
And when you can't see the sun  
Just remember it'll come up  
So don't lose sleep  
Take it from me  
It's not that deep  
No. It's not that deep

Finally got your nails done and one of them just broke  
Wanted to watch TV and you lost the remote  
Swore you'd have a good round hand over your heart  
Now you're in the rough and you're ten strokes over par  
Yeah some days we fall apart

But anytime you want to curse  
Just remember it could be worse  
So don't go crying over spilled milk  
Or making mountains out of molehills  
And when you can't see the sun  
Just remember it'll come up  
So don't lose sleep, take it from me  
It's not that deep  
No. It's not that deep

Anytime you want to curse  
Just remember it could be worse  
So don't go crying over spilled milk  
Or making mountains out of molehills
