

# Breathe

Sasha

You've got the sun on your face  
That's nothing new  
You got them all on the case  
All on the case just for you  
And it's easy when you don't look down  
You need me, to keep you safe and sound

You can hear me calling  
When everything is falling  
Around you round you  
You can hear me coming  
When life it starts running  
Around you round you  
Yeah I know that we'll find  
Happiness in our mind  
If we keep our minds open to see  
All that we gotta do  
Is just remember to breathe

You've got the best of friends  
You know it's true  
You're one up on a man  
And I'm making a plan all for you  
And it's alright if you don't fight this alone  
Cause tonight you won't be on your own

You can hear me calling  
When everything is falling  
Around you round you  
You can hear me coming  
When life it starts running  
Around you round you  
Yeah I know that we'll find  
Happiness in our mind  
If we keep our minds open to see  
All that we gotta do  
Is just remember to breathe

And it's alright if you don't fight this alone  
Cause tonight you won't be on your own

You can hear me calling  
When everything is falling  
Around you round you  
You can hear me coming  
When life it starts running  
Around you round you  
Yeah I know that we'll find  
Happiness in our mind  
If we keep our minds open to see  
All that we gotta do  
Is just remember to breathe

All that we gotta do  
Is just remember to breathe
