

Explain My Heart

Saul Williams

The war I feel in me
Natural catastrophe
A tremor in the heart
Where feelings have their start
The blood flows to the brain
Each feeling gets a name
And gets its turn to speak
When feelings reach their peak
The voices of un-named
The sane labelled insane
The truth is changing lanes
As I'm crossing the street
My heart break skips a beat
The noises of the street
Like lava through my veins
The love I can't explain

I take my heart and I divvy it
Separate pawns in the city blocks
I walk around on the city blocks
Until my sirens enter my thoughts

Explain to me the price of a free soul
It seems to me each highway has it's toll

I take my heart and I divvy it
Separate pawns in the city blocks
I walk around on the city blocks
Until my sirens enter my thoughts

It seems to me each highway has it's name
But there's something I can't explain

Explain my heart

I take my heart and I divvy it
Separate pawns in the city blocks
I walk around on the city blocks
Until my sirens enter my thoughts

It sees in every heart that beats
Employ the streets for weeks
Into the soldiers of my mind
If I can enjoy the pain
My heart's the same as them this time

Explain my heart

Divided heart
Divided testament
Mummified by dogmas
The present has no history
There's no time like the present
No better place to be
Than where you are
Within my heart
Like within you

Is me

Explain my heart
