

Rocket

Saul Williams

We're taking we, we're taking off
I plant a seed and watch it grow
I plan to reap the seed I sow
We're taking we, we're taking off

When I go I'll explore
Beyond life, All that we know
To unfold the untold
All the mysteries yet to be known
I want to go up like a rocket in the sky
Beyond every doubting eye
And I reach what I seek
Yes, yes, the stars begin to speak
When I take off like a rocket

Rocket in the sky
You think drugs can get you high
But I know that my soul
Is so beyond substance control
Watch me take off like a rocket in the night
Beyond history implied
We will dance while soldiers fight
And explode into the night
Watch me take off like a rocket

Rocket, I'm in space
And the darkness knows my face
Every stratus states its case
And an angel takes her place
And we take off like a rocket in your heart
Every ending has it's start
And with love like yours and I
All it takes is just one spark
And we take off like a rocket

Watch me take off like a rocket

We're taking we, we're taking off
I plant a seed and watch it grow
I plan to reap the seed I sow
We're taking we, we're taking off
