

Computerized Love

Savage

I see you dancing through my sixty-four
Sixty-four eyes on you
It really happened in my fantasy
Are you reflecting on my video.

You know i want you through the telephone
I got my chips on you
You're calling there you put your modem on
Don't play the keyboard with that melody.

Because you know the fantasies
I'll never have your dreams
Behind your eyes your fancy films
Imagining again.

Computerized love
I wanna feel it together
Computerized love
Are you setting on my memories.

Please save the moment in a calling mode
Don't push the enter too
Reset your logic to the unit two
And i will catch your mind inside of me.

I'll make you see the universe
And you will stay with me
I'll make you feel the way i do
Computining in you.

(hallo, switch on the computer)

Computerized love
I wanna feel it together
Computerized love
Will you save your love inside of me.

Computerized love
You'll be in my heart forever
Computerized love
Are you setting on my memories.
