

Tap Out

Saving Abel

Take your best shot at me
If you think you're ready
Well I can make this so much easier for you
Cause if it's me you're after, well it might
Make all go faster, if you
Only knew all the things I knew
So where you going know

[Chorus]

Take your best shot at me
If you think you're ready
You got something to say, then say it to my face
(You got something to say, then say it to my face)
Take your best shot at me
I don't think you're ready
You want to step in the ring
I'll put you in you're place

You're going to tap out
If you think you still got me
Believe me I won't let it stop me
Cause I'm not holding my breath
Or spelling this out for you
All this time you keep wasting
Dodging all this confrontation
Still all I want is to watch you while you bleed
Where ya going know

[Chorus]

Take your best shot at me
If you think you're ready
You got something to say, then say it to my face
(You got something to say, then say it to my face)
Take your best shot at me
I don't think you're ready
You want to step in the ring
I'll put you in you're place

You're gonna tap out

I see you running your mouth but you're got nothing to
say
I think you're talking to much
We should be swinging this out, but now you're running
away
I see you're scared just a little
So keep running your mouth and watch your luck run out
I think you talk too much
You won't walk away

[Chorus]

Take your best shot at me
If you think you're ready
You got something to say, then say it to my face
(You got something to say, then say it to my face)
Take your best shot at me
I don't think you're ready

You want to step in the ring
I'll put you in you're place

You're gonna tap out (2x)
You got got something to say, then say it to my face
You're gonna tap out
