

# Wishing Well

Saviour

Borrow a mask to pretend  
Two faced til the end  
Progress is time so slowly  
Brace for the now until then  
A place you can mend  
Burrowing down beneath my skin

You've killed me before  
But still I let you in  
I bet you'll do it again

Patiently  
You crawl under the surface  
Down beneath my skin  
Take from me  
When you're feeling hopeless  
Find the shine within

Burst my heart

You are not the only part  
I'll pick up the pieces when  
You crawl under my skin

Break my bones  
I am not the only friend  
You broke into pieces when

The ice was wearing thin

So break my fucking bones

Fake my final breath  
Birth til death  
Shine until I fade

Fake my final breath  
Birth til death  
I'll blame no-one by myself  
For every wish that never came true  
And you

Patiently  
You crawl under the surface  
Down beneath my skin  
Take from me  
When you're feeling hopeless  
Find the shine within

Find the shine within

Every coin in my wishing well  
Has stories to tell  
Sing me to sleep

Every light on my carousel  
Drag me through hell

Sing me to sleep

Patiently I count  
Every coin in my wishing well  
Has stories to tell  
Sing me to sleep

Shine until I fade  
Every light on my carousel  
Drag me through hell  
Sing me to sleep

Sing me to sleep
