

In This Town

Sawyer Brown

In this town there's just one picture show
Not a soul I know
In this town, in this town
I'm just somebody new, there's not a lot to do
But hang around
Well they roll up the sidewalks every night at nine
It's just no place to be and just the place for me

Cause in this town
I never loved you
In this town
You never said you loved me too
In this town I never lost you
And your memory never comes around
Every time the sun goes down
In this town

In this town down at the coffee shop
No one asks why you're not there with me
And in this town I never have to lie
And tell you I'm alright each time we meet
No there's no place to go where we used to go
But lots of room to hide, oh I think I'll stay a while

Cause in this town
I never loved you
In this town
You never said you loved me too
In this town I never lost you
And your memory never comes around
Every time the sun goes down
In this town

Cause in this town
I never loved you
In this town
You never said you loved me too
In this town I never lost you
And your memory never comes around
Every time the sun goes down
In this town
