

Mother

Sawyer Fredericks

Who elected you to lead
And how much further till we reach your dream
Spewing fumes of toxic gas
How much longer do you think we'll last

Just say you're useless and we'll throw ya on the stack
And now you're thinking aw just cut me some slack, but

Play better with our mother I dare you to care
Bad weather won't get better if you pull on her hair
When there's no chance for life in the soil
That's when the ocean starts to boil
Play better with our mother I dare you to care
Play better with our mother I dare you to care

These politicians love to lie
But we'll eat them up when they all try
As mother earth begins to change
They're inclined to stay the same

All the useless, we'll throw them on the stack
And now they're thinking aw just cut me some slack but

Play better with our mother I dare you to care
Bad weather won't get better if you pull on her hair
When there's no chance for life in the soil
That's when the ocean starts to boil
Play better with our mother I dare you to care

Save, change, care for our mother
Save, change, care for our mother
Save, change, care for our mother
Save, change, care for our mother
