

Save Me

Saybia

I'm a kleptomaniac, and I am proud to say that I'm also a hypochondriac

As well so tell me what to do, ooh

I'm scared of going outside coz I could catch a cold, I'll catch another's cold

I'm desperate to be arrested coz I'm so unsure of what I might do

Save me, before I break the law again

God save me before I make another sin

Now I'm getting treated for my mental illnesses

And every night I lock the door to my little lover self

But I forgot to tell I'm also claustrophobic

Save me, save me before my head explodes

Save me, save me so I can break my mental code

Now I'm starting to get well,

But still i'm scared coz every time I see her child I get erections

So please, save me, save me before my head explodes

Now save me, so I can break my mental code

Now save me, save me before I break the law

Oh save me so I can break my mental code (my mental code)

Save me from myself

Save me

God save me from myself

Oh won't you save me?
