

# Without You

SayWeCanFly

I know that you loved me a lot  
I just never quite knew why that was  
So afraid that I was not enough  
That it turns out I was not enough

Look, I still drink sometimes when I'm down  
But I quit smoking cigs, aren't you proud  
Look, I know that you don't give a shit  
But I'm comforted

Cuz it still doesn't feel like you're gone  
But my heart will not let me move on  
Now I wish I had chosen my words  
You were doing okay how you were

(Hope you're doing okay while I hurt)  
(Hope you're doing okay)  
(Hope you're doing okay)

And I just want you to know that the last time  
I drove you home was the last time I felt okay inside  
And when you're not here in my car  
I can't help but pretend that you are but I'm not okay  
And the world is dark without you

(I know that you loved me a lot  
I just never quite knew why that was)

I know you've been going through shit  
I just wish I could help you through it  
When it rains I still think of your face  
On those dark, dark days

When you drove to my apartment after work  
Cuz you always put my feelings first  
When you cried and I just made it worse  
Driving my own hearse  
Off the cliff that I built for the view  
So that I could sit up there with you  
Damn, the water looks colder tonight  
Will the water feel colder tonight  
Hope you're doing okay while I hurt

And I just want you to know that the last time  
I drove you home was the last time I felt okay inside  
And when you're not here in my car  
I can't help but pretend that you are but I'm not okay  
And the world is dark without you

I'm still stuck on the first time you laid in my bed  
With your legs wrapped around me, your skin on my skin  
But I knew you would hurt me cuz I knew I'd want you to stay  
(I'm sorry I pushed you away)  
Well, I could've told you it's just for the best  
If you leave in the morning or right after this  
But I knew I would hurt you cuz I knew you'd want me to stay  
Sometimes it's just better that way

I know that you loved me a lot
