

## E Pollution

Scariot

The days we know no longer exist  
Defragmentation of the structures within  
Who can peer deep inside the future?  
All riddled in the code of conduct  
Machines has become gods in this world  
Rage is rising towards this soulless breed  
Who makes past, present, and future blend  
Controlling every single move, applying laws and rules  
Machines has become gods in this world  
Rage is rising towards this soulless breed  
Systems overloaded, the world turns dark  
Rivers flooding with blood  
Electronic pollution falls from the sky - The signs are all here  
...  
Who am I in the system? - Who am I to stand in the way?  
Who am I in the process? - A piece of the puzzle that toils to  
adapt  
It feels like the future is here now - Realizing it was never g  
one  
Just another screensaver - The signs are all here...  
Black rain is falling - Loss of faith, in a dead end storm  
Play your role in the system  
The evolution of destructive instincts  
World tension is building - A cold blade on the throat of manki  
nd  
Distance now increasing - As we enter narrow focus mode  
Ctrl - alt - delete - the end of the cycle  
Forced / quit / shutdown - strange loops take us into the mix  
Past / present / future - controlled human factor  
Distorted / mind / system - some sort of over lit neon expanse  
Deconstruction...  
Deconstruction...  
Deconstruction...
