

Where's the squad heading to next?  
With or without you  
I've already saw my own value  
My demons became my best friends  
Trust don't exist in this pitfall of mess  
Look, I used to be amateur  
Dropped in a room full of scavengers  
Everyday massacre, had to go  
Build up the stamina, Go Go Gadget-uh  
Weigh up the level or dive off the banister  
Ego damager, flee you in a coffin and carry on  
New challenger in the mirror, I'll batter ya  
Save my place a quick body like Hamilton  
My mind's more twisted than Matt Hoffman's handlebars

Don't try me today. No, don't try me today  
(Said no) Today, don't try me today  
Don't try me today

So many fuckers lack basic respect  
Where's your mind gone, fam? Where's your intelect?  
Instead you're indirect, wanna move sideways  
That's fine, I'm not interested in you insects, I'm  
Calming my temper  
Turn down never  
At boiling point degrees, I'm not sweating  
Heart of a master  
I'm bad til I'm better and took off the leash  
Then I burn down the kennel then  
Up my intelignce, medicine won't kill my mind  
I'm so venomous  
Elegance, somehow, just pulse through my skeleton  
I've been a menace since both of my parents split  
Time doesn't heal  
It just makes you forget the shit  
If you can't see it, you're blind  
It's evident  
Way back since Genesis  
I've been on the side of the fridge  
Despite of a bet higher than a jet sits  
No flying, we don't run from the feds  
Might duck, pull me anotha side down  
Nothing can hurt me, I been through the worst  
No, I'm not cursed  
I'm sat here upping my worth  
Casually gunning for first  
You know that I need that  
Fucking believe every word  
Me and my homies  
We came from the dirt  
The city's alive  
Like we grew from the Earth  
Oh Lord...
