"Wheel up, wheel!"

Drop after drop

Scarlxd, duh

Eugh

Make no sense price of fame  
I don't wanna do it say R.I.P  
Pack it the suitcase catch that flight  
Nothing that they doing can kill the flame  
No broke boys can kill my vibe  
It's my choice how I live my life  
If I waste time get back stride  
Not my first time getting this high  
I don't settle down get back up  
Leave me alone with lengths I've done  
Deep in my soul how I get that far  
Keep the control or you'll get messed up  
Keeping all the checks can't spend that now  
Feelings of regret gotta shut that down  
Saying you the best like I drop that crown  
King Scarlxrd still runs this sound

They been assuming I'm on evasive  
Only solutions, I just want pay days  
I don't wanna do shit, I don't want saving  
Up with the foolish what's where you aim  
Nothing to prove now so get out my way  
All these illusions came with the fame  
Bitch I'm not moving stuck in my lane  
Ok

I collapse another life  
Can't come back a second time  
I'll go first and cross that line  
Not my first time severing ties  
Overtime your strength will die  
The more control the less they fight  
The way you fold it says a lot  
The only price I pay's the cost  
I'm at the top where anything goes  
While on the surface they're going insane  
Making them suffer, we carry the scope  
Infinite worship to carry the game  
I've been here searching for methods to cope  
Starting to learn how to worship the pain  
If you insist we just sever your soul  
Feel the abyss while your lying awake  
The once I break that wall  
Came for the bricks, that's ours, that's ours  
Hiding the risk, can't think that far  
Came for the stack, I'ma take that charge  
Play from the brain, I'ma rage for the lost  
Saving the pace, I'ma stay with the art  
Label erased gotta pay for the chart  
Pain in your face and I laughed when they lost
