

# NIGHTCRAWLER

Scarlxrd

Bring the noise, got no choice, they avoid me  
Paranoid in your voice, they deployed me  
Never chasing, it's too much here lately (Yeah!)  
I make bank then dip, no safety  
I'm too up and gone with crazy, twisted innocence

(Scar-lxrd, uh  
And beyond)  
(A-a-aye, PULSE, that shit slaps)

Never blink say, I  
Going for the win, if I miss I die  
Trial, weakness lacks a high note  
It would be a lie if I said that I feel great today  
Hated since a child, uh, patience is a cycle  
Passion in my eyes how I'm hoping for a greater day  
I don't wanna talk no more, I failed it's true  
War when I'm back up on my wave again  
Coming back for blood, I can't stop, I'll break through  
Non-stop, you'll see me as the main event, ah

Back up on this shit again, I feel suicidal  
This shit so embarrassing, to live inside of cycles  
Way too numb to save me from the push to cross the line, uh  
No one's set of life, uh, that shit is pretend, uh  
I could cut my neck up but I'm sure it's not my time, uh  
Fictions from my pride, uh, and it's a pain to express  
Is it a sign that I'm not over?  
Limitations suggest that living is a part of something bigger  
Fame in unjust  
And even if I die, I suffered for what?  
Angel conversations and they say it's not done  
It's our life but I've been wasted for days, this isn't working  
Is the sight I'm chasing worth dying? God has to know  
'Cause if I'm a target, I been needing reasons to keep faith if I'm honest  
I don't wanna change with everyday, I'm divided  
I still want to wake up and be grateful for conscious  
I been so unstable, got me thinking I lost it (lost it)  
Ah, that's some bullshit  
'Cause I've been riding for so long, I'm nauseous  
Are we the son of a serpent?

To flex on evil is a sign  
Pieces of my mind thinking of a better way  
"Demons are inside", uh  
If demons are inside, can't let them motherfuckers pave the way  
I don't want a trail, weakness lacks a high note  
It would be a lie if I said that I feel great today  
Hated since a child, uh, patience is a cycle  
Passion in my eyes how I'm hoping for a greater day  
I don't wanna talk no more, I failed it's true  
War when I'm back up on my wave again  
Coming back for blood, I can't stop, I'll break through  
Non-stop, you'll see me as the main event, ah  
Never blink say, I  
Going for the win, if I miss I die

Why?  
I thought you'd learn  
Dissonance is taking all my energy  
I thought you'd learn  
Wasted my life  
Wasted all my life on superficial shit  
Can't get back time  
It's like you blink and then your life is almost done  
What have I done but bring you misery?  
Is it my time to say goodbye and leave it done?  
I hope you smile at all the memories  
Why?  
I thought you'd learn  
Dissonance is taking all my energy  
I thought you'd learn  
Why?

(2024, 1xrd)
