War

Scarlxrd

When this shit kicks in
I want everyone to die, simple
Scarlxrd

This is the war
Remove the fear
You're a product of the shit
That you can't do
Destroy yourself if you have to
This is the war
Remove the fear
You're a product of the shit
That you can't do
Destroy yourself if you have to

This is savage
You can't manage
What we stand in
Act sick, catch an elbow
You'll need a bandage
Lavish, living like a king
I imagine
Try me and I'll lose my fucking mind
And cause some damage
Everybody has a price
Yeah I'm done with playing nice
You can live inside your crimes
My intentions so precise
Cut you off, I'm cold as ice
On the surface you're alright
You're still hurting deep inside
Fuck the barking, come and bite, bitch

The lies we live in
You tried to forget
That something's still missing
The fear is with the dead

This is the war
Remove the fear
You're a product of the shit
That you can't do
Destroy yourself if you have to
This is the war
Remove the fear
You're a product of the shit
That you can't do
Destroy yourself if you have to

The lies we live in
You tried to forget
That something's still missing
The fear is with the dead
