

## Give Me Something

Scars on 45

I carved your name  
In an old oak tree  
But the council chopped it down  
Because it was filled with disease

And I sent you a thousand messages  
But not a single one came through

Please  
Give me something  
Something to hold on to  
Give me something  
That links me to you  
Give me something  
Something to hold on to  
And I'll wear your wedding ring for a lifetime

I've seen a place  
Where your fingers lock with mine  
But the view it disappeared  
As my alarm clock hit the time

And I've made a million wishes now  
But not a single one's come true

Please  
Give me something  
Something to hold on to  
Give me something  
That links me to you  
Give me something  
Something to hold on to  
And you'll wear my wedding ring for a lifetime

Please  
Give me something  
Something to hold on to  
Give me something  
That links me to you

Give me something  
Something to hold on to  
Give me something  
That links me to you

Give me something  
Give me something  
Give me something  
Just give me something
