

Lighten up the Dark

Scars on 45

When we're together
Our bodies, they start fires
And when we kiss there's electricity
And raging sparks

We were a ghost town
In the shake down
We were sinking like a stone
Our heads were fair grounds
On the rebound
Rolling fast into the great unknown

Remember silence
It can be golden
You'd find there's just no need

To explain what you're meaning
When you're wrapped in your feeling

When we're together
Our bodies, they start fires
And when we kiss there's electricity
And raging sparks
(No!)

We've had the feeling of dangerous desire from the start
So tonight, we're lighten up the dark

We rode a fine line at the right side
Now our names are written in the sun
It could be high tide on the wrong side
But the waves couldn't wash away our plans

So don't you keep on
Compromising
When you know what your feel

Give your heart into [?]
Leave nothing unspoken
(No!)

When we're together
Our bodies, they start fires
And when we kiss there's electricity
And raging sparks
(No!)

We've had the feeling of dangerous desire from the start
So tonight we're lighten up the dark

Give your heart into [?]
Leave nothing unspoken
(No!)

When we're together
Our bodies, they start fires
And when we kiss there's electricity

And raging sparks
(No!)

We've had the feeling of dangerous desire from the start
So tonight, we're lighten up the dark
(No!)

When we're together
Our bodies, they start fires
And when we kiss there's electricity
And raging sparks
(No!)

We've had the feeling of dangerous desire from the start
So tonight, we're lighten up the dark
