What If I Leave

Schuyler Fisk

What if I leave
Would you miss me when I'm gone
Would you wonder what went wrong
And who's to blame
What if I stay
Or if I just wandered away
Would you come looking for me
I guess we'll see

And I know
If you'd been a different man
And I'd been a different girl
We could have been so good together

And if I leave
Would you find somebody new
Would she take good care of you
Would it be the same
And if I stay
There's no way you'd ever change
Give me what I need
I won't wait and see

I know
If you'd been a different man
And I'd been a different girl
We could have been so good together
We could have been so good together

What if I leave
Would I have to say goodbye
For you to finally realize
What this could be
My mind as well leave

I know
If you'd been a different man
And I'd been a different girl
We could have been so good together

I know
If you'd been a different man
And I'd been a different girl
We could have been so good together
We could have been so good together

What if I leave
What if I leave
What if I leave
