

Thunder And Lightning

Scorpions

I left you once
You killed me twice
Seems like the devil
Rolled the dice
What have you done
What can we do
To make it through

Remember when life was free
As free as our minds
Wounded hearts

Thunder and lightning
In the heat of the night
Some lonely highway
It's a hell of a ride
Turn it up to extreme
Let the engine scream
And leave it all behind
Thunder and lightning
In a stormy night

The gun was pointed to my head
You walked away and I was dead
In the name of love
You've turned to dust
What I've called trust

Remember when we were young
And innocent too
The monsters stayed behind the walls
No fears at all

Thunder and lightning
In the heat of the night
Last exit my way
It's a hell of a ride
Turn it up to extreme
Let the engine scream
And leave it all behind
Thunder and lightning
In a stormy night
