

World I Used to Know

Scott Stapp

Save me from tomorrow's sins
Cause I been down this road
And where it goes it never ends
Wake me... my mind has been enslaved
Or am I so far gone
I'll never be myself again

Hate, shame
Who's to blame?

Where's the world I used to know
A change has come from every side
Only to divide
A soul sickness in the bones
What happened to, what happened to the world
I used to know

Help me... someone take my hand
So heavy no fight left
Losing grip in the quicksand
With every move I make
Sink deeper, suffocate
A nightmare future that you never will escape

Hate, shame
Who's to blame?

Where's the world I used to know
A change has come from every side
Only to divide
A soul sickness in the bones
What happened to, what happened to the world
I used to know

The world I used to know

What have we done?
What have we done?
What have we done?

With the world I used to know
Change has come from every side
Only to divide
A soul sickness in the bones
What happened to, what happened to the world
What happened to, what happened to the world
I used to know

(The world I used to know)
The world I used to know
(The world I used to know)
