

Small Town Girl

Scotty McCreery

She'll turn that radio on soon as she's in your truck
She'll find an old country song, smile and crank it up
She'll roll that window on down, feel that fresh country air
And she'll look perfect, she ain't worried about her hair, nah

That one red light, she'll kiss you like you ain't been kissed before
Cool with a crowd or ridin' round or swingin' on that porch
I guess you could, why would you look around this big old world?
Don't waste your time, you ain't gon' find one like a small town girl

She'll steal a sip of your beer and trust me, you won't mind
She'll throw your Chevy in gear, throw some wood on the fire
Might be from right down the street that you grew up on
She'll make you feel like you're right at home

That one red light, she'll kiss you like you ain't been kissed before
Cool with a crowd or ridin' round or swingin' on that porch
I guess you could, why would you look around this big old world?
Don't waste your time, you ain't gon' find one like a small town girl

Just like mine, one look in her eyes
I knew I'd spend my whole life
With that small town girl
Yeah, she's a small town girl

She'll have you buying a ring after three short months
She'll have you looking at land where your kids can run
She'll have you callin' your momma and your daddy and your brother
They gon' love her
Oh, 'cause she's a small town girl

That one red light, she'll kiss you like you ain't been kissed before
Cool with a crowd or ridin' round or swingin' on that porch
I guess you could, why would you look around this big old world?
Don't waste your time, you ain't gon' find one like a small town girl

Just like mine, yeah
Small town girl
I'll spend my whole life with that small town girl

Jeans on a limb, the first one in at the river
She's born and raised and you'll stay right there with her
I guess you could, why would you look around this big old world?
Man, you just need to find a small town girl

A small town girl
