Closer

Screaming Trees

Histories are held within your heat So let it go Open all the doors around your eyes And let us know Certain keys are held within your hand So let it show

Bring us closer to the flame Bring us closer to the fire Where's the spark within your eye Where's the spark

Thunder in your ears Until you can't hear this at all Rivers flowing tears Until your destinies dissolve Drifting through the years Until a voice receives your call

Bring us closer to the fire Bring us closer to the flame The end and beginning are the same It's all the same

Mysteries are kept within your heart So let it show Open all the doors around your eyes And let us know Certain keys were held until they must have let you go

Bring us closer to the flame Bring us closer to the fire This world can't take us any higher
