

After Hours

Sea Girls

Am I touching all the right places?
I'm always laughing, you're pulling faces
I swear to God, there's something different
'Cause when I talked, babe, you listened
To me

I love you, but I know you're seeing him
I bet he's touching everywhere I've been
Do you think of me when he's not around?
We're driving cars in your direction after hours

Little lies raise suspicion
I wanna be part of your exhibition
If you got that yearning like me
Drinking for two can turn to three
Easily

I love you, but I know you're seeing him
I bet he's touching everywhere I've been
Do you think of me when he's not around?
We're driving cars in your direction after hours

I'm driving home alone
Don't just want to know you after hours
I can show you, I can show you
Let me show you

I love you, but I know you're seeing him
I bet he's touching everywhere I've been
Do you think of me when he's not around?
We're driving cars in your direction after hours

I love you, even though you're loving him
It hurts me like a knife breaks on my skin
But if he wasn't there, would you come around?
We're driving cars in your direction after hours
