

In Winters Eyes

Seabear

In winter's eyes, you are mine
Red eyes tell you dead lies
And meet me again

I follow you, with my eyes closed
I might find a way
What will be, we will be

I go, I go, I go with you
We fall down, start over new
I look, I look into your eyes
Come tumbling down, spirit on fire

And everything changes
You know as well as I
So let the years pass slowly by

Don't spend until another life finds you
The way I do

I follow you with my eyes closed
Shine a light where it's warm
Take you home, you have nothing
Pick your dreams from the stream

I follow you with my eyes closed
Dream when you can't sleep
Everything changes you know as well as I
So let the years pass slowly by

Every time you close your eyes
Fall down you and I

I go, I go, I go with you
We fell down, start over new
I follow you with my eyes closed
We will see when you can't swim
I know winter will never look at you
The way I do

And everything changes
You know as well as I
So let the years pass slowly by

In winter's eyes, you are mine
Red eyes tell you dead lies
And meet me again
