

Explosion

Seafret

I could've listed every single way I need you with what I try,
try
You know I wanted all
I couldn't give you every reason to believe me
But I, I need a miracle, a miracle she said
Love is more like a loaded gun than a safety net
To fall back on
Like walking around with a ticking bomb and just counting down
To the explosion

All I need is one chance just improve that we're all not the same
Our love shines like a mirror ball
We'll take it easy out and never try to make it change
Just try it yourself for yourself for

She said
Love is more like a loaded gun than a safety net
To fall back on
Like walking around with a ticking bomb and just counting down
To the explosion

I try to hide it but I'm only lying to myself
Don't need no doctor I know she's the best thing for my health
Don't never please me and disease me they can keep the wealth
Do what you have to
I don't want nobody else

Love is more like a loaded gun than a safety net
To fall back on
Like walking around with a ticking bomb and just counting down
To the explosion
