

Find A Way

Seahaven

Hey, I know you're in it, it's okay
Because something's always gotta give
I know you're waiting to be saved
But waiting never made a change

Go and find a way, find a way to wake up
Find a way to move, find a way to move on
Find a way to be, find a way to be strong
Go and find a way, you go on and find a way
You want to make it right, that doesn't make it right now
It takes a little time, it takes a little time out
Life ain't what it was when you were you younger
Go and find a way, you go on and find a way

'K, I know she left you, it'll be okay
You shouldn't have to make her stay
You spin the feeling, and let it play
So you can lay it down and let it be

Go and find a way, find a way to wake up
Find a way to move, find a way to move on
Find a way to be, find a way to be strong
Go and find a way, you go on and find a way
You want to make it right, that doesn't make it right now
It takes a little time, it takes a little time out
Life ain't what it was when you were you younger
Go and find a way, you go on and find a way

Hold, hold on, you say, you say
And I know that it hurts, you say, you say
We all feel lost some days, some days
Just hold, hold on, and you find your way

Go and find a way, find a way to wake up
Find a way to move, find a way to move on
Find a way to be, find a way to be strong
Go and find a way, you go on and find a way
You want to make it right, that doesn't make it right now
It takes a little time, it takes a little time out
Life ain't what it was when you were you younger
Go and find a way, you go on and find a way
