

# Fading Away

Sean Stemaly

Here I am rollin' sixty-five again  
Static on the radio, fading out, and fading back in  
Just like we do, we say that we're through  
Then we find a way back to where we left off like nothing was wrong  
The flame will burn for awhile but it won't last long 'til we

Go through the motions, and we drown in the oceans  
Trying to get back to what this was, before we left it in the dust  
Then we, get back to the basics  
When it don't work then we chase it  
Like there's something to chase  
Girl we're fading away  
Yeah, we're fading away

The picture on my dashboard is making it hard  
To keep the thought of you out of my head and not wonder where you are  
I can give in and drive back to you  
But we both know what that's going to lead to, when you

Go through the motions, and we drown in the oceans  
Trying to get back to what this was, before we left it in the dust  
And we get back to the basics  
And when it don't work then we chase it  
Like there's something to chase  
Girl we're fading away  
Yeah, we're fading away

And I know it's just a matter of time  
Before we light it all up just for one more night  
Then we burn that bridge back down by the sunrise

We go through the motions, and we drown in the oceans  
Trying to get back to what this was, before we left it in the dust  
And we get back to the basics  
And when it don't work then we chase it  
Like there's something to chase  
Girl we're fading away  
Yeah, we're fading away, oh  
Yeah, we're fading away  
We're fading away
