

## Message In A Bottle

Sean Stemaly

It's been a living hell ever since you left, but I've been here before

Cause every time you walk away I walk back through that door  
Took this broken heart down off the shelf and poured it on the rocks

Cause misery loves company and whiskeys all I've got  
It's all I've got woah it's all I've got

So I drive my dodge back to the spot I watched you walk away  
Down every drop and pray it stops this lost you kinda pain  
The more I drink the more I sink trying to get down to the bott om

Of why I became this double shot desperado  
Trying to find a message in a bottle

Rumors run around this town like they got legs and feet  
Drunk off the wine from the poison vine that you grew out of me  
Out of me  
Since you walked out on me

So I drive my dodge back to the spot I watched you walk away  
Down every drop and pray it stops this lost you kinda pain  
The more I drink the more I sink trying to get down to the bott om

Of why I became this double shot desperado  
Trying to find a message in a bottle

I've got these problems I can't swallow  
So I pour 100 proof  
Hoping this fifth will fill the hollow  
Cause I can't handle the truth

So I drive my dodge back to the spot I watched you walk away  
Down every drop and pray it stops this lost you kinda pain  
The more I drink the more I sink trying to get down to the bott om

Of why I became this double shot desperado  
Trying to find a message in a bottle

Of why I became this double shot desperado  
Trying to find a message in a bottle  
Mmm yeah
