

New Worship

Sebadoh

There's a lie we've been living through

Think you're all alone, it's not quite true

No one cares, 'cause no one should

Everything you see was meant to be misunderstood

Safe & sound, so safe & sound

Move your body back and forth and round & round

And all my friends are killing me, all my friends are killing me

All my friends are killing me; I think I'm a genius
