

Your energy revives me
Allows me to unburden my soul
My mind gets too deep, this moment
I've been waitin' for the longest

The vibe is right, connect the signs
Put the rest aside for the day, put the phones away
What a waste of life, a waste of time, time, time
Save the best for last, 120 on the dash
Pussy so good, gotta have it
Pussy so good, gotta crash
Almost crashed my car, goddamn, oh God
Please save me

I, I lust for you
I can't hold it back, back, no more
(Can't hold it back)

Oh, but stay the night
Maybe miss your flight
Roll some earth, get you light
Put my hope in your slice
There's a piece of our love
I can tell that you down
I wanna show you off, see
These hoes hatin' on the side, ay
What's your decision girl?
I can tell your vision's blurred
But your mind's made up, your body follows
See, heaven came down to my place
Watch me bless you with no hands

I got a lust for love
I can't hold it back, back, no ,more
(Can't hold it back)

The vibe is right, connect the signs
Put the rest aside for the day, put the phones away
What a waste of life, a waste of time, time, time
Save the best for last, 120 on the dash
Pussy so good, gotta have it
Pussy so good, gotta crash
Almost crashed my car, goddamn, oh God
Please save me
