

# Queen From The Stars

Sebastien

Why does your skin seem like a stone?  
Why don't you search dreams lived through in your doze?  
The day starts to moan  
Empty dawn has blackened your home

How do you stop this deep fall?

Why do you dance on sparkling steam?  
Why don't you go there, where's the end of your fear?  
How to overcome stream  
What is real  
May I break the fake seal

I'm feeling your steps in my mind  
Let's enter my life

My queen from the stars  
I can't hide the desire  
So give me your shine  
Welcome to world of fortune  
Made out of us  
Live through your dreams thousand times  
My queen from the stars

Your touch's melting white snow again  
Your winter-born heart finds unfrozen land  
It's closer to you  
Lucid sense could make you a fool

Your breath is warming my lips  
Lighting the fire

My queen from the stars  
I can't hide the desire  
So give me your shine  
Welcome to world of fortune  
Made out of us  
Live through your dreams thousand times  
My queen from the stars

Wild flowers, the sweet taste of wine  
High towers, the air full of dragonflies  
Salvation is granting the grace  
Temptation is more that blinded faith

The fragrance and colour of strings  
Old omens reminding forbidden sins  
Two fairies flies through untamed wind  
Their glories will give them eternal freedom

Just give me your shine

My queen from the stars  
I can't hide the desire  
So give me your shine  
Welcome to world of fortune  
Made out of us

Live through your dreams thousand times  
My queen from the stars
