

I know there's a place  
In your heart that no ones been to  
Somewhere that I know you keep locked away  
I can see on your face  
That you've been wondering about me  
Could I be the one that you let in someday

I just wanna know you  
Feel myself adore you  
Hold my heart out for you  
Build you up a home  
I just wanna show you  
I'd do anything to  
Keep you safe and loved  
So you'll never feel alone  
I just wanna know you

What can I say  
It's been the best few years of my life  
I knew from the second that I met you I was done  
And I know a way  
That we could make this last forever  
Take my hand and then together we'll be one

I just wanna know you  
Feel myself adore you  
Hold my heart out for you  
Build you up a home  
I just wanna show you  
I'd do anything to  
Keep you safe and loved  
So you'll never feel alone  
I just wanna know you

We got one on the way  
It's been a long road for us to get here  
But a few more months and we can finally say

I just wanna know you  
Feel myself adore you  
Hold my heart out for you  
Build you up a home  
I just wanna show you  
I'd do anything to  
Keep you safe and loved  
So you'll never feel alone  
I just wanna know you  
I just wanna know you
