

## Earth Hour

## Secrets of the Moon

it's digging underground  
and beyond the stars It burns  
veil by veil  
one by one  
before the curtain falls

here is the earth hour  
here is the center of the storm  
we're singing while the world burns  
saturnalia unfolds

it comes in silent steps  
and it's crying in our sleeps  
see when the lights aflame  
the immensity of things

here is the earth hour  
here is the center of the storm  
we're singing while the world burns  
saturnalia unfolds  
we're singing while the world burns  
lutes are dying away unheard

purging sounds of fires  
piercing lights grow higher  
all of us are taken  
all that was is gone
