

Let Me In

Secrets

Give up and get out to dismiss this love
Collide and ignite, we fall back in it
Let's do it over again
We're running in circles getting drunk of the spin
Don't give me the surface, I'll be under your skin
Come on let me in

I can't take it anymore
Doubting all that you can't ignore
That you hear me
I'm knocking at your heart's door

Let me in, let me in
I wanna breathe your fire again
Let me in, I know this song's a risk
But it's worth the consequence
Don't be afraid to make a mistake
We're already falling
Let's make it worth the trip
Let me in, I know this song's a risk
But I'm not afraid of it

Give up and get out to dismiss this love
Collide and ignite, we let it consume us
Let's do it over again
Love doesn't ask, it just invites itself in
So don't give me the surface, I'll run under your skin
You're gonna let me in

I can't take it anymore
Doubting all that you can't ignore
That you hear me
I'm knocking at your heart's door

Let me in, let me in
I wanna breathe your fire again
Let me in, I know this song's a risk
But it's worth the consequence
Don't be afraid to make a mistake
We're already falling
Let's make it worth the trip
Let me in, I know this song's a risk
But I'm not afraid of it

How can you be so blind with eyes open
Because you never stopped to think about the things I say
Worse than the things that I do for you
I'll always try, I'll always try for you
I'll always try, I'll always try and sing this song

Let's do it over again

Let me in, let me in
I wanna breathe your fire again
Let me in, I know this song's a risk
But it's worth the consequence
Don't be afraid to make a mistake

We're already falling
Let's make it worth the trip
Let me in, I know this song's a risk
But I'm not afraid of it

Let me in, let me in
I wanna breathe your fire again
Let me in, I know this song's a risk
But it's worth the consequence
Don't be afraid to make a mistake
We're already falling
Let's make it worth the trip
Let me in, I know this song's a risk
But I'm not afraid of it
