

# Heaven Knows

Sega Bodega

Keep your hands around my neck, cut me with glass  
This is all I need and all I ask  
Drink my blood and drain my veins, but don't let me die  
The devil's by my side  
Give my soul to her and take away the pain  
And until I'm dead just hack and maim  
Eat the rest and keep it secret for when you go  
So only heaven knows

I see demons

Keep your hands around my neck and hold me close  
Pray to God that we just overdosed  
It's the little things that make you truly want to die  
The devil's on my side  
You were clumsy with the work, you left a stain  
Even if I'm dead the fact remains  
Burn the bed as well as all of your ruined clothes  
So only heaven knows

I see angels, I see demons  
I've been told what heaven knows  
I see angels, I see demons  
I've been told what heaven knows  
They come, so only heaven knows

With you I always end up killing time  
I jump between such hoops for feeling fine  
With you I always end up killing time  
I jump between such hoops for feeling fine  
With you I always end up killing time  
I jump between such hoops for feeling fine
