

CONSTELLATIONS

Seinabo Sey

Say you love me when you know you don't

Conste-constellations overhead
I remember-member everything you said
All this confrontation leaves me dead
Let me take a swim in all the tears we shed
You don't do a damn thing right
Smoking on your Marlboro light
See I
I need some love and affection
Baby I need some direction

You deserve the—you deserve the best
Gave until your world had nothing left
Drowning in your tears
Screaming like he didn't hear

You deserve the stars
From Jupiter to Mars
Don't you dim your light
Your heart has been working overtime
Constant constellations in your head
Your worth more than he confessed
If you're wondering where you are
Then just look up 'til you glow up
You're a star, star, star, star,
I need some love and affection
Just follow your light for direction
Girl 'cause you're a star, star, star, star,
I need some love and affection
Just follow your light for direction

Yeah
If you have to dim your light
Baby you know
You know something ain't right
You don't know wrong from right
Swim into that feeling, all is done, everything fine

You know that feeling right
Hold on my dear
Tell them something ain't right
You know we need your light
Look up to the stars
To find out who you are
'Cause you're a star

I need some love and affection
Just follow your light for direction
I need some love and affection
Baby I need some direction
